# ITP 308: Lab4

Setup

In this lab you will create a drawing file for a simple part.

Requirements

You have been given a part file to create the drawing of. The part file is the part below:

You must create a drawing that satisfies these requirements:

- Lists all the proper dimensions to recreate the part
- Gives notes for any dimension that cannot be created (midpoint relationships, symmetric relationships)
- Denotes the location of the origin in all drawing views
- Denotes the drawing view label (top, right, isometric, etc)

You may use any standard size drawing template sheet.

Deliverables

Save your file as: **lab4.SLDDRW**

Compress the Lab4Part.sldprt and lab4.slddrw into a single zipped file named: ***username*_lab4.zip**

Submit your zipped file to Blackboard

Rubric

You will be graded on the following things:

Item	Points
All dimensions are given	2
Notes present for dimensions not created	2

Origin present in all drawing views	2
Drawing views are labeled	2
Includes Lab4Part.sldprt	2
Total	10
